-

PROJECTS

Teacher's Evaluation Management System

Cavite State University - Imus, June 2024

- Developed a web-based system to automate the teacher evaluation process by students
- Implemented features such as Sign In/Sign Up, dynamic evaluation forms, real-time rating computation, and teacher profile management

- Enabled administrators to manage teacher details, including names, subjects, and sections
- Technologies used: PHP, MySQL, HTML, CSS, JavaScript

Leave Management System

Cavite State University - Imus, December 2024

- Developed a web-based system to manage employee leave applications and approvals
- Implemented features such as user authentication, leave request submission, status tracking, and admin approval dashboard
- Enabled real-time monitoring of leave balances and generated summary reports for HR
- Technologies used: PHP, MySQL, HTML, CSS, JavaScript

TES HR Management System

Cavite State University - Imus, July 2025

- Designed and developed a web-based HR system to manage employee records, attendance, and leave requests in TES.
- Implemented features such as employee registration/login, profile management, time-in/time-out tracking using face recognition (Python), leave monitoring, and leave summary
- Integrated facial recognition using OpenCV to enhance attendance accuracy and security
- Technologies used: PHP, MySQL, HTML, CSS, JavaScript, Python, and OpenCV

Student Portal

St. Dominic College of Asia - Bacoar Cavite, July 2025

- Enhanced an existing web-based student portal during On-the-Job Training by improving the user interface and user experience for students and administrators.
- Refined layout structure, visual consistency, and navigation to make key features more accessible and user-friendly.
- Collaborated with the project team to identify usability issues and implement front-end improvements based on user needs.
- Technologies used: HTML, CSS, JavaScript, Bootstrap, PHP, and HeidiSQL.

LexiAid: Mobile Based Legal Information Chatbot Application for Women and Children

- Developed a mobile application that provides legal information and support for women and children through an AI-powered chatbot.
- Implemented bilingual interaction, hotline access, and legal assistance features to improve accessibility to relevant services.
- Integrated AI capabilities to deliver user-friendly responses and support legal information inquiries through mobile devices.
- Technologies used: React Native, OpenAI, Supabase, Google Cloud, FastAPI, and Expo Go.
